

# Ooops.... Miss! Again! What is wrong ?

1

- A. Breathing during squeezing the trigger
- B. Vertical body sway
- C. Not enough physical fitness

2

- A. Improper body position (rifle is forced on target)
- B. Incorrect rifle holding
- C. Horizontal body sway

3

- A. Incorrect trigger pull (sideways pull)
- B. Trigger finger is touching trigger guard
- C. Incorrect sight alignment (to the left)

4

- A. Incorrect sight alignment (to the right)
- B. Too much thumb pressure on rifle grip

5

- A. Sight aperture is too small (front) – optimal is around 3.2 mm
- B. Pulling back on rifle when firing

6

- A. Trigger pull is too fast
- B. When firing, muscles are too tense, causing unrelaxed position

7

- A. Excessive pulling back on rifle when firing
- B. Inappropriate movements in elbows (right elbow sliding out)
- C. Trigger pull is too slow
- D. Sling too tight

8

- A. Pulled shot
- B. Trigger pull is too fast
- C. Sling is too loose

9

- A. Pulled shot
- B. Pressure on rifle to the left which causes muzzle to drop
- C. Left elbow too much on the inside (prone)

10

- A. Incorrect alignment of wrist when firing
- B. Too much pressure on thumb pad when firing
